

EZ-ACC

FOR THOSE JOBS THAT ARE ALL ABOUT KEEPING IT SIMPLE

EXTREMELY USER FRIENDLY

EZ-ACC has been developed for the customer who needs to control traffic throughout their buildings without over complicating things. EZ-ACC is second to none in ease of installation and day to day administration.

PROVEN TECHNOLOGY

Hartmann Controls has been in business for over 10 years, trusted by thousands of customers world wide. Whether your site has one reader or hundreds of readers spanning hundreds of buildings Hartmann will deliver. We pride ourselves in building the best quality products and providing support that is second to none for both large and small installations.

FLEXIBLE COMMUNICATIONS

Communicate with your field panels via TCP/IP or keep it even simpler by just connecting them directly to a P.C. USB port, eliminating dependancy on network connectivity.

GRAPHICAL SCREENS THROUGHOUT

Create Time Zones using drag and drop to schedule doors to unlock automatically during set times or to allow certain groups of users access to specific doors at specific times.

PROUDLY
100% NORTH AMERICAN
DESIGNED AND MANUFACTURED

EZ COMMAND CONSOLE

Hartmann Controls has kept it as simple as possible with the EZ-ACC line. Minimal screens to navigate with extremely intuitive interfaces make administration a snap.

REPORTS

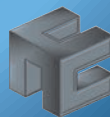

Easy to use predefined reports will allow the system administrator to quickly review system activity. Run a report on users movement or door activity.

FULLY DISTRIBUTED PROCESSING

EZ-ACC has been designed as a distributed system, where individual components will not compromise the integrity of the entire system. EZ-ACC controllers will operate 100% independently of the software.

LOWEST COST OF OWNERSHIP

EZ-ACC is ideal for the smaller installation, or for companies new to access who do not want to be overwhelmed with complexity or support issues. EZ-ACC is the simplest most cost effective system on the market to date.

HARTMANN
CONTROLS CORP.

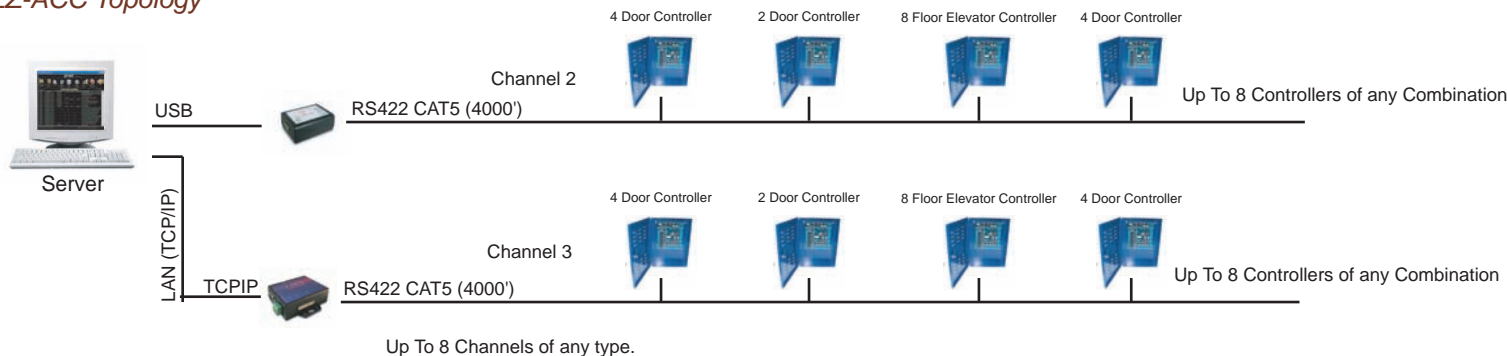

EZ-ACC Hardware and Software will Boost your Installation and Administration Efficiency

EZ EZ EZ best describes this Access Control System. Built using the same designers that created PRO-ACC but with the mandate to keep it simple and cost effective without compromising quality. EZ-ACC is extremely simple to install, administer and maintain. It will without a doubt provide you with the lowest cost of ownership while still maintaining exceptional quality.

SYSTEM SPECIFICATIONS

- * Maximum 8 Channels
- * Maximum 8 Panels
- * 16 Doors Supported
- * 1000 Card Holders
- * 255 Access privileges
- * 200 Time Zones
- * 2000 On Board Events
- * 32 Holidays
- * First Card In Supported
- * Manage up to 8 Buildings via TCP/IP

EZ-ACC Topology

EZ-RIF 2 DOOR CONTROLLER

- * Supports 2 Card Readers
- * Back up Circuitry
- * 2 lock / control relays, 1 dedicated for each reader port
- * 2 Exit button and 2 Door contact inputs
- * Power requirements: 12V DC 1.5Amp
- * Supports Hartmann high security 40 bit & 26 bit Wiegand as well as most other formats
- * 1000 users on board storage
- * 2000 event on board storage
- * On board LED's indicate communications, Active Relays, and Power Present
- * Relays are Form C contact rated at 10A 125VAC
- * Removable Terminal Blocks

COMMUNICATIONS

- * TCP/IP and USB Communication protocols supported
- * RS-422 communication using CAT5 cable

EZ-RIF 2 DOOR POWER REQUIREMENTS

- * 12V DC 1.5 Amp Supply
- * 12V DC 7Amp/hr Battery Back up Optional

READER TECHNOLOGIES

- * Proximity
- * Radio Frequency for parking applications
- * Biometrics

SOFTWARE REQUIREMENTS

- * Windows XP or greater
- * Minimum 20Meg Hard Drive

DIMENSIONS

- * Panel size: 3.6" x 3.6"
- * Enclosure: 10.25" x 8.5" x 3.25"
